## 1.0 PURPOSE

As a reference document that specifies the environmental legislation and standard requirements for products and parts supplied to Elo Touch Solutions (Elo).

## 2.0 SCOPE

### 2.1 Content

This specification covers the applicable documents, regulations and requirements for supplier product environmental compliance.

### 2.2 Overview

The supplier requirements specified cover: 1) the elimination of “Banned Substances”, 2) the controlled usage of “Restricted Substances”, 3) the notification on the use/non-use of certain “Declarable Substances”, and 4) the disclosure of material content information.

### 2.3 Application

This specification applies to all materials, parts, components, and products (including packaging materials where indicated) supplied to Elo, whether finished or semi-finished.

## 3.0 REFERENCED DOCUMENTS

### 3.1 Regulations and Standards

Elo Touch Solutions’ requirements for suppliers are based on the following regulations and certain additional industry and customer requirements:

#### A. International

- a. Montreal Protocol on Substances that Deplete the Ozone Layer
- b. Stockholm Convention on Persistent Organic Pollutants
- c. ISPM-15 International Standards for Phytosanitary Measures, Publication Number 15
- d. IATA 2013 Dangerous Goods Regulations
- e. IMDG Special Provision 188 for Shipping Lithium Batteries

#### B. Europe

- a. Directive 2011/65/EU

EU RoHS (Recast)

**NOTE:** RoHS (recast) was published on 8 June 2011 and repealed Directive 2002/95/EC (RoHS) starting 3 January 2013. EEE product scope under RoHS recast will include 3 new categories that will progressively come into implementation towards 21 July 2019. RoHS (recast) continues to restrict the same hazardous substances with the same thresholds as RoHS, but have identified DEHP, DBP, BBP, and HBCDD as priority substances to be reviewed for possible inclusion in the near future into the directive. RoHS (recast) requires finished EEE manufactured in and shipped into the EU to bear the CE mark and requires manufacturers to keep a Declaration of Conformity and technical files to document conformity to the directive. All these new requirements may trigger more demands for test reports and systematic management in the supply chain.

- b. Directive 2015/863
- c. Directive 2006/66/EC
- d. Directive 2013/56/EU

Ammending Annex II to Directive 2011/65/EU  
Batteries and Accumulators and Waste Batteries and Accumulators  
Ammending Directive 2006/66/EC on Batteries and Accumulators and Waste Batteries and Accumulators

- e. Directive 2009/251/EC Products containing the biocide dimethylfumarate are not to be placed or made available on the market
  - f. Directive 94/62/EC Packaging and Packaging Waste
  - g. Directive 2012/19/EU Waste Electrical and Electronic Equipment
  - h. EN 50419:2006 Marking of Electrical and Electronic Equipment in accordance to Article 11(2) of Directive 2002/96/EC
  - i. Regulation EC No 1907/2006 REACH (Restriction, Evaluation, Authorization and Restriction of Chemicals)
  - j. Regulation EC No 842/2006 Certain fluorinated greenhouse gases
  - k. Regulation EC No 850/2004 Persistent Organic Pollutants
  - l. Regulation EU No 757/2010 Amending Regulation EC 850/2004 on Persistent Organic Pollutants
  - m. Regulation EU No 519/2012 Amending Regulation EC No 850/2004 on Persistent Organic Pollutants
  - n. Regulation EU 2016/293 Amending Regulation EC No 850/2004 on Persistent Organic Pollutants
  - o. Denmark Executive Order BEK No. 1113 of 26 November 2012 regulating the use of phthalates DEHP, DBP, BBP, and DIBP
- C. Asia

## 4.0 DEFINITION OF TERMS

- 4.1 **Article:** Object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition.

- 4.2 **Banned Substances:** Substances whose intentional use is not permitted in any quantity for all indicated applications. If a threshold value is indicated, it applies only to impurities that are not intentionally added and the amount of impurity of the substance must be less than the threshold value.
- 4.3 **Button Cells:** Any small round portable battery or accumulator whose diameter is greater than its height and which is used for special purposes such as hearing aids, watches, small portable equipment and back-up power.
- 4.4 **CAS (Chemical Abstract Service) Numbers:** A unique registration numerical identifier for one chemical (substance).
- 4.5 **Consumer-Purchased Finished Goods:** Products that is sold to consumers and is ready for use by end users. Elo Consumer-Purchased Finished Goods include monitors, computers, and Interactive Digital Signage. Does not include components that are sold to customers who incorporate components into their Consumer-Purchased Finished Goods (e.g. touchscreens, touchcontrollers).
- 4.6 **Controlled Substances:** Controlled substances are consisting of Banned Substances, Restricted Substances, and Declarable Substances.
- 4.7 **Declarable Substances:** When Declarable Substances are present above the specified limits for the specified applications in any materials, parts, and products supplied to Elo, suppliers are required to inform and notify Elo of its presence and use.
- 4.8 **EEE (Electrical and Electronic Equipment):** Equipment which is dependent on electric currents or electromagnetic fields in order to work properly and equipment for the generation, transfer and measurement of such currents and fields and designed for use with a voltage rating not exceeding 1000 Volts for alternating current and 1500 Volts for direct current (Directive 2011/65/EU definition).
- 4.9 **Full Material Declaration:** A full material declaration discloses 100% of the homogenous materials that are found in the supplied materials/parts and a 100% of all the substances that are contained in those materials. Materials or substances (whether "Intentionally Added" or not) contained in materials/parts purchased (and in turn incorporated into supplier's products) must be disclosed. It is recognized that in certain situations, 100% disclosure by CAS Registry Number may not be feasible due to confidentiality or proprietary nature of the information. In such case, a supplier declaration shall also be supplied to Elo.
- 4.10 **Homogenous Material:** one material of uniform composition throughout or a material, consisting of a combination of materials, that cannot be disjointed or separated into different materials by mechanical actions such as unscrewing, cutting, crushing, grinding and abrasive processes.
- 4.11 **Intentionally Added:** Deliberately used in the formulation of a product where its continued presence is desired to provide a certain characteristic, appearance, property, attribute or quality.
- 4.12 **Mixture:** A mixture or solution composed of two or more substances.
- 4.13 **Packaging:** All goods made of any material of any nature to be used for the containment, protection, handling, delivery, and presentation of products from the producer to the customer or the consumer. Packaging can be categorized but is not limited to primary, secondary and tertiary packaging.
  - Note 1: Items are considered to be packaging if they fulfill the abovementioned definition without prejudice to other functions which the packaging might also perform, unless the item is an integral part of a product and it is necessary to contain, support or preserve that product throughout its lifetime and all elements are intended to be used, consumed or disposed of together.
  - Note 2: Packaging components and ancillary elements integrated into packaging are considered to be part of the packaging into which they are integrated. Ancillary elements hung directly on, or attached to, a product and which perform a packaging function are considered to be packaging unless they are an integral part of this product and all elements are intended to be disposed of together.
  - Note 3: Packaging does not include road, rail, air or sea containers
  - Note 4: The term "Packaging" is frequently used in the integrated circuit industry to simplify the term IC Packaging which refers to the final stage of semiconductor device fabrication, which is outside the scope.
- 4.14 **Restricted Substance:** Substances whose presence above the specified limits for the specified application in any of the parts, products, and materials supplied to Elo are not allowed / restricted, unless a valid exemption applies. Valid EU RoHS exemptions are specified and listed in Table 4 in Section 7.4 herein.
- 4.15 **Substance:** A chemical element and its compounds in the natural state or obtained by any manufacturing process, including any additive necessary to preserve its stability and any impurity deriving from the process used, but excluding any solvent which may be separated without affecting the stability of the substance or changing its composition.

- 4.16 **Substance of Concern:** Substances that are not currently banned or restricted by Elo, but may be (or will be) banned/restricted in the future according to Industry Standards or upcoming regulations.
- 4.17 **Supplier Declaration of Compliance:** A declaration by suppliers that certifies the compliance of the parts or products indicated in the declaration with the environmental legislations, standards, or substance restrictions the declaration references.

## 5.0 SAFETY

N/A

## 6.0 SUPPLIER REQUIREMENTS

### 6.1 Parts and Materials Compliance

For all parts and materials supplied to Elo, suppliers shall ensure that parts and materials comply with the chemical substance requirements, as specified in Section 7 (Substances in Products) herein.

- A. All materials and parts supplied to Elo shall not contain Banned Substances or Restricted Substances above the allowed threshold for the pertinent applications as specified in Table 1 herein, unless an applicable EU RoHS exemption applies.
- B. When Declarable Substances are present in materials or parts supplied to Elo above the threshold levels in applications specified in Table 2, suppliers shall notify Elo regarding the presence of the Declarable substance above the threshold limit.

### 6.2 Product Labeling

#### A. China RoHS

Under China RoHS, all of Elo's consumer-purchased finished electrical/electronic products will require proper China RoHS product labeling as specified in SJ/T 11364-2014. Labeling is composed of Environmental Friendly Use Period (EFUP) label and a tic-tac-toe diagram that discloses the presence of RoHS hazardous substances above threshold levels specified in GB/T 26572-2011 in different product components.

#### B. EU RoHS Recast (Directive 2011/65/EU)

Consumer-purchased finished electrical and electronic goods: All of Elo's consumer-purchased finished electrical and electronic goods shall demonstrate compliance to EU RoHS Recast by the affixing the CE mark on the finished product visibly, legibly, and indelibly. Markings other than the standardized CE mark shall no longer be used to demonstrate compliance of consumer-purchased finished electrical/electronic products to EU RoHS as this is illegal starting 3 January 2013.

Other Elo Finished Goods: Compliance of other Elo products (i.e. non-EEE products, and non-consumer-purchased products), such as Bezels, Touch Screens, and Touch Controllers may still and shall be demonstrated by the non-standardized RoHS label specified in LABEL, EU Directive (SD503235) that Elo prescribes.

#### C. EU WEEE (Waste Electrical and Electronic Equipment) Directive

Under the EU WEEE Directive, Elo is responsible for registering as a WEEE producer and for making collection, recycling, and reporting arrangements in EU Countries where Elo:

- Manufactures and sells EEE (electrical and electronic equipment) under his own brand;
- Resells under its own brand EEE which is produced by other suppliers; or
- Imports/exports EEE on a professional basis into the Member State

Under the WEEE Directive, Elo consumer-purchased finished goods that is put into the market after August 13, 2005 shall bear the appropriate cross-out wheelie bin mark as specified in EN 50419 Standard.

D. EU Battery Directive

Batteries shall bear the appropriate crossed-out wheelie bin mark as specified in Annex II of Directive 2006/66/EC. Additionally, batteries with:

- More than 0.0005% of Mercury by weight of battery shall be marked with chemical symbol “Hg”;
- More than 0.002% of Cadmium by weight of battery shall be marked with chemical symbol “Cd”;
- More than 0.004% of Lead by weight of battery shall be marked with chemical symbol “Pb”.

E. US Battery Act

Rechargeable batteries must bear the three chasing arrows or a comparable recycling symbol. Additional marking requirements apply for rechargeable Nickel-Cadmium batteries and Lead-acid batteries. These required labeling shall also appear on packaging of rechargeable batteries that are sold separately.

F. California DTSC Perchlorate Warning

The following label shall be on the shipping box of Elo products that contain perchlorate-containing material (e.g. lithium coin cell batteries). To ensure legibility of the label, a minimum font size of 10 Arial shall be used.

This warning is for California (USA) use only and applies to Lithium coin cell contained in device:  
Perchlorate Material - special handling may apply.  
See [www.dtsc.ca.gov/hazardouswaste/perchlorate](http://www.dtsc.ca.gov/hazardouswaste/perchlorate).

G. Taiwan CNS 15663

Labeling according to Taiwan CNS 15663 shall be in user manual of Elo’s consumer-purchased finished electrical/electronic products. Labeling is composed of a diagram that discloses the applicability of RoHS exemption, and presence of RoHS hazardous substances above threshold levels specified in CNS 15663 in different product components.

6.3 Product Packaging

A. Controlled Substances

Elo Banned Substance, Restricted Substance, and Declarable Substance requirements for packaging materials apply to all packaging materials supplied to Elo, as well as all packaging materials used to ship parts / materials to Elo or directly to Elo customers. Banned Substances, Restricted Substances, and Declarable Substances that may be found in and apply non-exclusively to packaging materials are denoted by “(May be present in packaging)” in the Application column of Tables 1 and Table 2.

B. Recycling Labels

Recycling Labeling requirements apply to suppliers that provide Elo packaging materials and suppliers whose packaging materials are used to supply products/materials to Elo that could ultimately reach Elo customers. *Packaging Specification* (ES600665) serves as a guideline for graphic component selection and placement on packaging carton for Elo finished goods, and includes specification for the recycling label that should be on packaging cartons.

C. Solid Wood Packaging Materials

All solid wood packaging materials, including solid wood shipping pallets, shall conform to ISPM-15 (International Standards for Phytosanitary Measures, Publication Number 15) and shall bear the appropriate IPPC symbol to demonstrate compliance.

## ENG SPEC, Green Procurement Guidelines

**ELO CONFIDENTIAL AND  
PROPRIETARY SUBJECT  
TO USE RESTRICTIONS**

This document and the information it contains are proprietary to Elo Touch Solutions and cannot be used or reproduced without the prior written consent of Elo Touch Solutions and subject to its written use restrictions.

### D. Shipping Lithium Ion / Polymer Batteries

When shipping lithium ion batteries, suppliers shall pay attention to relevant prevailing regulations and ensure proper product packaging, package labeling, and shipping documentation. Transportation of Lithium batteries excepted from Class 9 Dangerous Goods classification is regulated by:

- IATA Dangerous Goods Regulation, if shipped by air
- IMDG special provision 188, if shipped by sea.

### 6.4 Statement of Compliance

Suppliers shall provide a statement in a manner prescribed by Elo certifying that materials and parts supplied to Elo are in compliance to the chemical substance requirements specified in Section 7 (Substances in Products). Upon request from Elo, suppliers shall provide documentation to demonstrate the basis for the compliance statements provided to Elo. Examples of acceptable documentation include:

- A. Supplier Declaration of Compliance.
- B. Physical Test Report Results from a nationally or internationally certified test laboratory with ISO 17025 Certification. Test center should be accredited to perform chemical testing of Electricals and Electronics.
- C. Full Material Declaration.

### 6.5 Directive 2011/65/EU RoHS Recast Technical Documentation

Consumer-purchased finished electrical and electronic goods: Vendors shall draw up EU RoHS 2 Technical Documentation as specified in Directive 2011/65/EU and/or harmonized standard EN50581:2012 for all EEE supplied to Elo after January 1, 2013. Such Technical Documentation shall be maintained, updated, and made available upon request to Elo for 10 years following product release.

### 6.6 Legal/Notification Requirements

In addition to requirements referenced in this document, all suppliers shall comply with:

- A. Any other legal and regulatory requirements applicable to any products provided to Elo.
- B. Any additional legal, regulatory or customer requirements (of which supplier is aware) when such requirements would apply to products sold by Elo and into which supplier's products are incorporated. Suppliers shall notify Elo of any such additional requirements (of which supplier is aware).

## 7.0 SUBSTANCES IN PRODUCTS

This section specifies:

- The chemical substances that Elo Bans (B), Restricts (R), requires suppliers to Declare (D), and Assesses (A).
- The application in which chemical substance restrictions, bans, declarations, and assessments apply.
- The threshold limit, above which the use of the chemical substance for the specified application is restricted, banned, requires supplier declaration, or should be assessed.

These chemical substances are classified into the three categories. Banned Substances and Restricted Substances shall not be present above the specified limits for the specified applications in any of the parts and materials supplied to Elo, unless it qualifies for an exemption. Declarable Substances must be declared if present above the specified limits for the specified applications in all materials and parts supplied to Elo. Substances to Assess, though currently not regulated, might be restricted, banned, or required to be declared by Elo in the future.

Restricted, Banned, or Declarable substances that may be found in and apply non-exclusively to packaging materials are denoted by "(May be present in packaging)" in the Application column.

### 7.1 Banned / Restricted Substances

Table 1 below specifies the regulated chemical substances that are banned or restricted above the specified levels in materials and parts supplied to Elo. Substances covered by the EU RoHS may be present in parts and materials supplied to Elo above the allowed limits **ONLY IF** an exemption listed in Table 4 applies. When a supplier claims an EU RoHS exemption, they must provide technical documentation that specifies:

- The exemptions being claimed.
- The homogenous material containing the EU RoHS chemical substance above threshold levels.
- Explanation of the use or application of the chemical substance in the part / material and why they qualify for the exemption.

Table 1. Chemical Substances that are Banned or Restricted

| Substance Category                                                       | Category | Threshold Level                                                                                          | Application                                                                                                                         |
|--------------------------------------------------------------------------|----------|----------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| <b>Directive 2011/65/EU – EU Restriction of Hazardous Substances</b>     |          |                                                                                                          |                                                                                                                                     |

**7.2 Declarable Substances**

Table 2 below specifies the chemical substances that must be declared by suppliers if the chemical substance is present above the specified threshold limits in parts and materials supplied to Elo. Declaration shall include information regarding the use and location of the chemical in the parts and materials supplied to Elo. Suppliers shall phase out the use of the chemicals listed in Table 2 if technically feasible.

| Diisononyl phthalate (DiNP) (CAS# 28553-12-0, 68515-48-0)                                                                                                                           | D | Intentionally added              | External Parts (e.g. external cables and mechanical enclosures)           |
| Di-isodecyl phthalate (DIDP) (CAS# 68515-49-1, 26761-40-0)                                                                                                                          | D | Intentionally added              | External Parts (e.g. external cables and mechanical enclosures)           |
| Di-n-hexyl phthalate (DnHP) (CAS# 84-75-3)                                                                                                                                          | D | Intentionally added              | External Parts (e.g. external cables and mechanical enclosures)           |
| Tris(1,3-dichloro-2-propyl) Phosphate (TDCPP) (CAS# 13674-87-8)                                                                                                                     | D | 25 ppm                           | External Parts (e.g. external cables and mechanical enclosures)           |

|                                                                           |   |                                 |                                                                 |
|---------------------------------------------------------------------------|---|---------------------------------|-----------------------------------------------------------------|
| Tris(2-chloroethyl) Phosphate (CAS# 115-96-8)                             | D | 25 ppm                          | External Parts (e.g. external cables and mechanical enclosures) |
| Tris(2,3-dibromopropyl)phosphate (CAS# 126-72-7)                          | D | 25 ppm                          | External Parts (e.g. external cables and mechanical enclosures) |
| Tetrabromobisphenol A (CAS# 79-94-7)                                      | D | 1000 ppm                        | External Parts (e.g. external cables and mechanical enclosures) |
| 2,2-Bis(bromomethyl)-1,3-propanediol (CAS# 3296-90-0)                     | D | 1000 ppm                        | External Parts (e.g. external cables and mechanical enclosures) |
| Benzophenone (CAS# 119-61-9)                                              | D | 1000 ppm                        | External Parts (e.g. external cables and mechanical enclosures) |
| Benzidine-based Dyes                                                      | D | 1000 ppm                        | External Parts (e.g. external cables and mechanical enclosures) |
| 3,3'-Dimethoxybenzidine-based dyes metabolized to 3,3'-dimethoxybenzidine | D | 1000 ppm                        | External Parts (e.g. external cables and mechanical enclosures) |
| 3,3'-Dimethylbenzidine-based dyes metabolized to 3,3'-dimethylbenzidine   | D | 1000 ppm                        | External Parts (e.g. external cables and mechanical enclosures) |
| D&C Orange No. 17 (CAS# 3468-63-1)                                        | D | 1000 ppm                        | External Parts (e.g. external cables and mechanical enclosures) |
| 1-Amino-2,4-dibromoanthraquinone (CAS# 81-49-2)                           | D | 1000 ppm                        | External Parts (e.g. external cables and mechanical enclosures) |
| 1-Amino-2-methylantraquinone (CAS# 82-28-0)                               | D | 1000 ppm                        | External Parts (e.g. external cables and mechanical enclosures) |
| Direct Blue 6 (Technical Grade) (CAS# 2602-46-2)                          | D | 1000 ppm                        | External Parts (e.g. external cables and mechanical enclosures) |
| Direct Brown 95 (Technical Grade) (CAS# 16071-86-6)                       | D | 1000 ppm                        | External Parts (e.g. external cables and mechanical enclosures) |
| Disperse Blue 1 (CAS# 2475-45-8)                                          | D | 1000 ppm                        | External Parts (e.g. external cables and mechanical enclosures) |
| Naphthalene (CAS# 91-20-3)                                                | D | 1000 ppm                        | External Parts (e.g. external cables and mechanical enclosures) |
| <b>Other Declarable Substances</b>                                        |   |                                 |                                                                 |
| Perchlorates ( <b>Note 1</b> )                                            | D | 0.0000006% by weight of product | All                                                             |

**7.3 Substances to Assess**

Table 3 below specifies substances of concern that may be Restricted / Banned or Declarable if present in parts / materials supplied to Elo in the future.

Table 3. Chemical Substances of Concern

| Substance Category                                  | Category | Threshold Level                                     | Application                                                                   |
|-----------------------------------------------------|----------|-----------------------------------------------------|-------------------------------------------------------------------------------|
| Chlorine (CAS# 7782-50-5)                           | A        | 0.09% (w/w) of boards or laminates                  | printed circuit boards and substrate laminates                                |
| Bromine (CAS# 7726-95-6)                            | A        | 0.09% (w/w) of boards or laminates                  | printed circuit boards and substrate laminates                                |
| Chlorine (CAS# 7782-50-5)                           | A        | 0.1% (w/w) per plastic within component             | Chlorinated Flame Retardants ( <b>Note 1</b> ); PVC; PVC Copolymers           |
| Bromine (CAS# 7726-95-6)                            | A        | 0.1% (w/w) per plastic within component             | Brominated Flame Retardants                                                   |
| Bromine + Chlorine (CAS# 8826-95-6; CAS# 7782-50-5) | A        | 1500 ppm contained in resin plus enforcement matrix | Non-halogenated epoxide with a glass transition temperature of 120°C minimum. |
| Beryllium oxide (BeO) (CAS# 1304-56-9)              | A        | 0.1% (w/w) of product                               | Ceramics                                                                      |

**7.4 EU RoHS Exemption List**

Table 4 below lists out the EU RoHS Exemptions for specific applications that suppliers may claim in the case that EU RoHS substances are present above EU RoHS limits in the parts and materials they supply.

Table 4. EU RoHS Exemptions

| #           | Description                                                                                                                                                                                    | Scope and dates of applicability                             |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------|
| 3           | Mercury in cold cathode fluorescent lamps and external electrode fluorescent lamps (CCFL and EEFL) for special purposes not exceeding (per lamp):                                              |                                                              |
| 3(a)        | Short length ( $\leq 500$ mm)                                                                                                                                                                  | 3,5 mg may be used per lamp                                  |
| 3(b)        | Medium length ( $> 500$ mm and $\leq 1\ 500$ mm)                                                                                                                                               | 5 mg may be used per lamp                                    |
| 3(c)        | Long length ( $> 1\ 500$ mm)                                                                                                                                                                   | 13 mg may be used per lamp                                   |
| 5(a)        | Lead in glass of cathode ray tubes                                                                                                                                                             |                                                              |
| 6(a)        | Lead as an alloying element in steel for machining purposes and in galvanized steel containing up to 0,35 % lead by weight                                                                     | Expires on 30 June 2019                                      |
| 6(a)-i      | Lead as an alloying element in steel for machining purposes containing up to 0,35 % lead by weight and in batch hot dip galvanised steel components containing up to 0,2 % lead by weight      | Applies starting on 1 July 2019, and expires on 21 July 2021 |
| 6(b)        | Lead as an alloying element in aluminum containing up to 0,4 % lead by weight                                                                                                                  | Expires on 30 June 2019                                      |
| 6(b)-i      | Lead as an alloying element in aluminium containing up to 0,4 % lead by weight, provided it stems from lead-bearing aluminium scrap recycling                                                  | Applies starting on 1 July 2019, and expires on 21 July 2021 |
| 6(b)-ii     | Lead as an alloying element in aluminium for machining purposes with a lead content up to 0,4 % by weight                                                                                      | Applies starting on 1 July 2019, and expires on 18 May 2021  |
| 6(c)        | Copper alloy containing up to 4 % lead by weight                                                                                                                                               | Expires on 21 July 2021                                      |
| 7(a)        | Lead in high melting temperature type solders (i.e. lead-based alloys containing 85 % by weight or more lead)                                                                                  | Expires on 21 July 2021                                      |
| 7(c)-i      | Electrical and electronic components containing lead in a glass or ceramic other than dielectric ceramic in capacitors, e.g. piezoelectronic devices, or in a glass or ceramic matrix compound | Expires on 21 July 2021                                      |
| 7(c)-ii     | Lead in dielectric ceramic in capacitors for a rated voltage of 125 V AC or 250 V DC or higher                                                                                                 | <i>Renewal request under review</i>                          |
| 7(c)-iv     | Lead in PZT based dielectric ceramic materials for capacitors which are part of integrated circuits or discrete semiconductors                                                                 | <i>Renewal request under review</i>                          |
| 8(b)        | Cadmium and its compounds in electrical contacts                                                                                                                                               | <i>Renewal request under review</i>                          |
| 13(a)       | Lead in white glasses used for optical applications                                                                                                                                            | Expires on 21 July 2021                                      |
|             |                                                                                                                                                                                                |                                                              |
| 13(b)-(I)   | Lead in ion coloured optical filter glass types                                                                                                                                                | Expires on 21 July 2021                                      |
| 13(b)-(II)  | Cadmium in striking optical filter glass types; excluding applications falling under point 39 of this Annex                                                                                    | Expires on 21 July 2021                                      |
| 13(b)-(III) | Cadmium and lead in glazes used for reflectance standards                                                                                                                                      | Expires on 21 July 2021                                      |
| 15          | Lead in solders to complete a viable electrical connection between semiconductor die and carrier within integrated circuit flip chip packages                                                  | <i>Renewal request under review</i>                          |
| 21          | Lead and cadmium in printing inks for the application of enamels on glasses, such as borosilicate and soda lime glasses                                                                        | <i>Renewal request under review</i>                          |
| 24          | Lead in solders for the soldering to machined through hole discoidal and planar array ceramic multilayer capacitors                                                                            | Expires 21 July 2021                                         |
| 29          | Lead bound in crystal glass as defined in Annex I (Categories 1, 2, 3 and 4) of Council Directive 69/493/EEC (1)                                                                               | <i>Renewal request under review</i>                          |
| 32          | Lead oxide in seal frit used for making window assemblies for Argon and Krypton laser tubes                                                                                                    |                                                              |

|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|
| 34    | Lead in cermet-based trimmer potentiometer elements                                                                                                                                     | Expires 21 July 2021                |
| 37    | Lead in the plating layer of high voltage diodes on the basis of a zinc borate glass body                                                                                               | <i>Renewal request under review</i> |
| 39    | Cadmium in colour converting II-VI LEDs (< 10 µg Cd per mm <sup>2</sup> of light-emitting area) for use in solid state illumination or display systems                                  | Expires on 20 November 2018         |
| 39(a) | Cadmium selenide in downshifting cadmium-based semiconductor nanocrystal quantum dots for use in display lighting applications (< 0,2 µg Cd per mm <sup>2</sup> of display screen area) | Expires on 31 October 2019          |

**10.0 APPENDIX A: List of applicable substances**

| Arsenic Compounds                 |              |
|-----------------------------------|--------------|
| <b>Arsenic Compounds</b>          | <b>CAS #</b> |
| Arsenic                           | 7440-38-2    |
| Chromated copper arsenate (CCA)   | 37337-13-6   |
| Diarsenic pentoxide               | 1303-28-2    |
| Diarsenic trioxide                | 1327-53-3    |
| Triethyl arsenate                 | 15606-95-8   |
| Various - Other arsenic compounds | -            |

| Asbestos            |                           |
|---------------------|---------------------------|
| <b>Asbestos</b>     | <b>CAS #</b>              |
| Asbestos            | 1332-21-4                 |
| Actinolite          | 77536-66-4                |
| Amosite (Grunerite) | 12172-73-5                |
| Anthophyllite       | 77536-67-5                |
| Chrysotile          | 12001-29-5<br>132207-32-0 |
| Crocidolite         | 12001-28-4                |
| Tremolite           | 77536-68-6                |

| Azodyes and pigments                |              |
|-------------------------------------|--------------|
| <b>Aromatic Amines</b>              | <b>CAS #</b> |
| Biphenyl-4-ylamine                  | 92-67-1      |
| Benzidine                           | 92-87-5      |
| 4-chloro-o-toluidine                | 95-69-2      |
| 2-naphthylamine                     | 91-59-8      |
| o-aminoazotoluene                   | 97-56-3      |
| 5-nitro-o-toluidine                 | 99-55-8      |
| 4-chloroaniline                     | 106-47-8     |
| 4-methoxy-m-phenylenediamine        | 615-05-4     |
| 4,4'-methylenedianiline             | 101-77-9     |
| 3,3'-dichlorobenzidine              | 91-94-1      |
| 3,3'-dimethoxybenzidine             | 119-90-4     |
| 3,3'-dimethylbenzidine              | 119-93-7     |
| 4,4'-methylenedi-o-toluidine        | 838-88-0     |
| 6-methoxy-m-toluidine               | 120-71-8     |
| 4,4'-methylene-bis(2-chloroaniline) | 101-14-4     |
| 4,4'-oxydianiline                   | 101-80-4     |
| 4,4'-thiodianiline                  | 139-65-1     |
| o-toluidine                         | 95-53-4      |
| 4-methyl-m-phenylenediamine         | 95-80-7      |
| 2,4,5-trimethylaniline              | 137-17-7     |
| o-anisidine                         | 90-04-0      |
| 4-amino azobenzene                  | 60-09-3      |

| Brominated Flame Retardants (other than PBBs, PBDEs, or HBCDD)        |              |
|-----------------------------------------------------------------------|--------------|
| <b>Brominated Flame Retardants (other than PBBs, PBDEs, or HBCDD)</b> | <b>CAS #</b> |

## 11.0 NOTES

1. Refer to Appendix A for list of applicable chemical substances
2. Refer to Table 2. for list of applicable RoHS exemptions
- 3 EU Commission delegated Directive 2015/863 of 31 March 2015 amends Directive 2011/65/EU by adding DEHP, BBP, DBP, and DIBP to the list of EU RoHS restricted substances. These new substance restrictions will apply from 22 July 2019 for Elo products. Elo asks that suppliers phase out by 31 December 2016.
4. This substance may be used for wood preservation and may be found in wood pallets used for shipment or in wood packaging. Since wood pallets used to transport products to Elo may be reused to transport Elo products to customers, all wooden pallets shall conform to the requirements specified herein. Under REACH, packaging and wood pallets are be considered as articles, and thus when REACH Candidate List SvHC (Substances of Very High Concern) are present in packaging above the 0.1% limit, suppliers shall notify Elo accordingly.
5. The listed PAH are restricted per EU REACH Annex XVII and shall not be present above 0.00001% by weight of rubber or plastic components that will come in direct contact with end users. This restriction will come into force on December 27, 2015. Elo asks that suppliers phase out by June 01, 2015 the use of these regulated PAH above specified threshold limit in products to be supplied to Elo to ensure regulatory compliance of Elo products.
6. On June 13, 2017, the EU Commission updated EU REACH Annex XVII Restriction List to include restriction on Perflurooctanoid acid and its salts. From July 4, 2020, 1) PFOA and its salts shall not be present in concentrations equal to or greater than 25 ppb in any part of an article, and 2) PFOA-related substances shall not be present in concentrations equal to or greater than 100 ppb in any part of an article. Elo asks that suppliers phase out comply with new requirements by January 1, 2020.
7. On May 2, 2013, a decision was made to add HBCDD to Annex A of the Stockholm Convention on Persistent Organic Pollutants. As this amendment to the Stockholm Convention will enter into force on November 26, 2014, Elo asks that suppliers phase out by November 26, 2014 the use of HBCDD in products to be supplied to Elo.
- 8 In September 2015, the European Court of Justice held that EU importers notify and communicate to their customers when the product they import is or contains an article that contain a substance listed in the EU REACH SVHC Candidate List above 0.1% by weight of the article. Starting on Febuary 01, 2016, Elo suppliers shall investigate presence of EU REACH SVHC Candidate List in products supplied to Elo not only on the product level,

**ENG SPEC, Green Procurement Guidelines**

---

but on the component level. For example, if a REACH Candidate List SVHC is present above 0.1% by weight of a resistor or transducer contained in a monitor supplied to Elo, the monitor supplier will need to notify Elo of the presence of the Candidate List SVHC in the resistor or transducer, even if the Candidate List SVHC are not present in the monitor above 0.1% by weight of the monitor.

9. Regulated chlorinated flame retardants are not listed in the Chlorinated Fire Retardant table above and are listed in separate tables. Example: Short-chain chlorinated paraffin and TCEP, etc.
